

The Faculty of Chemistry and Pharmacy of the Julius-Maximilians-University of Würzburg invites applications for the faculty position of a

Junior Professor of Clinical Pharmacy and Applied Biochemistry (W1 with tenure track to W2 Professor, m/f/x)

to be filled by the earliest possible date as a temporary civil servant for an initial period of three years.

First founded in 1402, Julius-Maximilians-Universität (JMU), a member of the German U15, is one of the fifteen largest research-intensive and leading medical universities in Germany with a full range of subjects. True to its guiding principle ‘Science for Society,’ the JMU is committed to advancing research in fields relevant to the future. The Faculty of Chemistry and Pharmacy, with its 16 chairs under the motto ‘From Molecule to Function,’ is one of Germany's and the world's leading university institutions for research and study in the fields of chemistry, pharmacy, and biochemistry. We combine an excellent scientific reputation with a highly networked interdisciplinary research environment.

The successful candidate will contribute to teaching and research in the field of “Clinical Pharmacy”. Scientists whose research is concerned with topics relevant to the pharmaceutical sciences are invited to apply.

A willingness to participate in existing and future research networks and to initiate new collaborative projects is expected. The University of Würzburg attaches great importance to excellence in the supervision of students and doctoral candidates and expects high levels of engagement from teaching staff. Teaching duties will include courses in Clinical pharmacy and Clinical Chemistry as well as courses with similar content from our Food Chemistry Degree Program.

Candidates should have a relevant university degree, didactic aptitude, and a demonstrated ability for scientific research as usually proven by an excellent Doctoral degree, preferably in the field of pharmacy (Art. 63 Para. 1 Sentence 1 BayHIG). Teaching for the Degree Program “State Exam Pharmacy” is done exclusively in German, such that non-native speakers should have German level C1 or Goethe certificate C2 skills at the time of employment or obtain these within the first two years after employment.

Applicants should be in the early stages of a path towards professorship and should have changed universities after completing their doctorate or, if the doctorate was completed at the Julius-Maximilians-University, should have spent at least two years working in research outside of the Julius-Maximilians-University.

No more than four years should have elapsed between the doctorate and the end of the application period, no more than seven years in the case of degrees in medicine or clinical psychology. The date of the doctoral certificate is the deciding factor (cf. Art. 63 para. 1 sentences 5 to 7 BayHIG). An appointment as a civil servant can be made in accordance with Art. 65 Para. 1 Sentence 3 BayHIG in conjunction with Art. 23 Para. 1 BayBG only up to the age of 45. Exceptions are possible in certain cases. The temporary civil servant status is to be extended by three years in the event of excellent work performance. The continuation and appointment as a W2 university professor in a civil servant position for life will only be granted if the junior professor has proven himself or herself in accordance with the university's internal quality assurance concept.

The University of Würzburg aims to increase the proportion of women in research and teaching and, therefore, strongly encourages applications from suitably qualified female academics. Severely disabled applicants will be given preference in the case of equivalent qualifications.

Applications should be sent electronically with the appropriate documents (cover letter, dated and signed CV, relevant certificates and transcripts, list of publications including the five most important publications, list of courses and lectures given, acquired funding, outline of planned research, teaching concept) by **06.01.2025** via e-mail (fcp-berufung@uni-wuerzburg.de) in PDF format to the Dean's Office of the Faculty of Chemistry and Pharmacy.
